

SIS-TAG® brand Safety Instrumented System Device Identification Tags provide for high visibility and asset management of safety critical devices in harsh conditions in the process industries.

Part Number: SECE_RAL01

Dimensions: 1.5" x 2.5" x 0.02" (38.1mm x 63.5mm x 0.6mm) standard. Other sizes available upon request.

Materials: Anodized Aluminum with color and text permanently sealed in the anodic layer. Other materials available upon request.

Colors: Red and Natural Aluminum. Other colors available upon request.

Hole: 3/16" (4.76mm)

Corners: 1/8" radius (3.175mm)

Custom materials, sizes, colors and text available upon request. Customize your SIS-TAGs with one or more data fields for user defined text. Add device tag numbers, drawing numbers, SIF numbers, asset numbers or other custom data. SIS-TAGs can also be customized with your user defined bar code or QR code on the reverse for asset management and CMMS identification or with RFID approved for hazardous locations. "Do your maintenance personnel know which devices are part of your Safety Instrumented System? They would if they were tagged with SIS-TAG brand Safety Instrumented System device identification tags."
